Re: Carolina Contracting Solutions' performance.

To whom it may concern:

Charleston County Park and Recreation Commission recently contracted with Carolina Contracting Solutions, LLC, to make major repairs to the Slide Tower at Splash Zone waterpark, inside James Island County Park. The work involved replacing all the wooden components of the Slide Tower, including stairs, platforms, and handrails with fiberglass components.

We were very pleased with Carolina Contracting Solutions' performance. We found their employees, from the Project Manager on down, to be highly competent, professional, creative, and conscientious. Everyone involved with the project here at CCPRC was very impressed with Carolina Contracting Solutions, and we are very happy with the final product. This project had extremely tight time constraints, due to the need to open the waterpark on time. It was completed to our satisfaction ahead of schedule. We could not recommend Carolina Contracting Solutions more highly, and hope to work with them again on many future projects.

Sincerely,

Ray Ely, PMP
